Profile Summary

A passionate Mobile & Backend Developer specializing in Flutter and NestJS. Experienced in building scalable applications with clean architecture principles and efficient state management. Adept at working with both frontend and backend technologies to create seamless, user-friendly applications.

Technical Skills

- Programming Languages: Dart, TypeScript

- Mobile Development: Flutter, Riverpod, BLoC

- Backend Development: NestJS, MongoDB, Firebase, PostgreSQL

- Tools: Docker, Git, Firebase Storage, Retrofit

- UI/UX: Figma, GoRouter

Osunde Goodluck Michael
Mobile & Backend Developer

Work Experience

Mobile & Backend Developer (Freelance) | ITED eLearning App (April 2024 - October 2024)

- Built both the mobile app and admin dashboard.

- Used Flutter for the frontend and NestJS + MongoDB for the backend.

- Integrated Firebase Storage and JWT-based authentication using Passport.

- Cloudinary used for media storage.

Lead Frontend Mobile Developer (Volunteer) | Ridely (November 2024 – March 2025)

- Built the complete Flutter frontend with BLoC and clean architecture.

- Implemented the UI/UX design based on clean architecture principles.

- Collaborated with backend developers to integrate API and backend services.

Mobile Developer (Freelance) | Account App (May 2024 - July 2024)

- Developed an account and transaction tracking app using Flutter.

- Integrated REST API for backend services.

Backend Developer | Softzinat (January 2025 - Present)

- Built RESTful APIs using NestJS, MongoDB, and PostgreSQL.

- Developed authentication using Passport and JWT.
